Hi again Nicole,

Thank you again for getting back to me so promptly.

In our view NSL and NothConnect should be listed as two separate projects in the new list. It might seem strange to still bundle these two projects, since NSL is already under construction.

Best regards,
Kristin

Hi Kristin,

We do not have ACER's opinion yet but it should come soon. At the working level Decision Making Board meeting in July, Norway expressed its objections to the Maali project, which was subsequently taken off the draft list. You can find the list of projects on which ACER was requested for an opinion on the CIRCABC website.

We are preparing the Delegated Act for the new PCI list at the moment. We still have the unique situation in PCI 1.10 that it covers two projects (NSL and NorthConnect) without any specific reference to them. Could you agree to a presentation of both projects in the Act, each with their own specific sub number (1.10.1 NSL and 1.10.2 NorthConnect)? This is how it is done for all other projects and it would avoid confusion.

Please let me know what you think.

Best regards,

Nicole
