Investigations conducted on battery sheet materials used in automotive applications. Report on Major Automotive Sheet Applications

1.0 Summary

The present document gives a general overview and provides recommendations for major safety concerns which may affect the use of battery sheet materials in automotive applications. It is intended to provide a general overview of the following areas:

1.0.1 General information on the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

1.0.2 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

1.0.3 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

1.0.4 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

1.0.5 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

1.0.6 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

1.0.7 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

2.0

2.0.1 General information on the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

2.0.2 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

2.0.3 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

2.0.4 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.

2.0.5 Safety concerns associated with the use of battery sheet materials in automotive applications. This includes the types of products and their uses.
