These conditions are all part of the definition of a **strongly \mathbb{R} -linearly independent** family of vectors. In other words, **strongly \mathbb{R} -linearly independent** is a stronger condition than **linearly independent**.

Key Takeaways

Linear Independence

Remember, **linearly independent** is the same as **strongly \mathbb{R} -linearly independent** when the vectors are **real**. **Linearly independent** is a weaker condition than **strongly \mathbb{R} -linearly independent**. **Strongly \mathbb{R} -linearly independent** is a stronger condition than **linearly independent**. **Strongly \mathbb{R} -linearly independent** is a stronger condition than **linearly independent**. **Strongly \mathbb{R} -linearly independent** is a stronger condition than **linearly independent**.
